

CAREFREE COVID19 UPDATE – May 21, 2020:

The Board of Carefree Resort continues to monitor Alberta's relaunch strategy. We know we are all eager to return to normal, but even as the Province resumes some activities, the Board is not yet prepared to go back to the full freedoms of Carefree living as it was prior to the pandemic. We are moving forward while continuing to be cautious in the best interests of the safety of residents and staff.

With regards to closed common facilities, specifically, Washrooms>Showers>Laundry. We are pleased that the water/sewage facilities are available to individual units. Therefore, because the resort cannot adequately meet all AHS cleaning requirements, the Board deems these services non-essential and will **remain closed** as per the "Guidance for Private and Municipal Campgrounds" under "**Cleaning Shared Spaces and Equipment**".

The Board has relaxed some restrictions based on the '[Cohort Family](#)' statement to allow a second camping unit on a lot **ONLY** for **immediate family members** of the lot owner and must be limited to less than 15 occupants on one lot.

It is important that everyone continue to take personal steps to prevent the spread of COVID-19 and ensure it does not enter the gates of Carefree Resort. Please continue to practice 6-foot physical distancing from other residents and staff while in the resort. Please feel free to remind others if you witness this is not being followed.

Key Reminders:

- All facilities are closed including the office, clubhouse, washrooms/showers, laundry, playgrounds/parks, pool, etc. until we receive notice from AHS to open.
- Drop-off and pick-up boxes will be located outside the office for any required forms. Email is preferred or call the office in advance.
- 6-foot distancing from others that are not residents in your unit must be adhered to.
- It is advised not to bring visitors to your lot during these restrictions.
- Social outdoor gatherings are limited to 50 people with social distancing and less than 15 on individual lots.
- Please refrain from approaching Carefree staff. They will not be offended, but appreciative of your consideration for their safety.
- The store will be open; however, some services may not be available.
- Access to beaches will be assessed by AHS closer to the bathing season.

*You may wish to consider downloading and using the [ABTraceTogether mobile contact tracing app](#) when out in public or off your lot within the resort.

NOTE: We have been advised by AHS that they will be doing periodic visits to the Resort to observe COVID precautions. If mass gatherings and physical distancing is not being practiced,

then AHS will escalate it to the medical officers of health to get the facility shut down.” Obviously, this is not a welcomed outcome, but a possibility if some residents chose not to comply with AHS recommendations, thereby impacting all residents.

Prevent the Spread

We strongly request that if you are showing any symptoms that you notify the Carefree office and return to your primary residence immediately, as rural health services are not equipped to handle an outbreak.

With the above-mentioned precautions in place, we look forward to continuing to provide as many operational services as permitted.

We encourage you to be kind to others during these difficult times. We would like to thank all owners and family members for your understanding and precautionary efforts to prevent the COVID-19 virus from entering Carefree Resort!

If you have any questions regarding the COVID updates, please send an email to board@carefreeresort.com. We appreciate your time reading this update.

Carefree Board & Management

Stay Safe -- Stay Healthy – Stay Carefree!
